

REVERSIBLE COLOUR CHANGE TEMPERATURE INDICATING LABELS

The sensitive area of these labels responds quickly to temperature fluctuations to give a clear and easy to interpret indication of temperature value. On changing the applied temperature the label will quickly respond to the new value.

Applications include environmental, live electrical, engineering, food, and pharmaceutical applications.

Accuracy: $\pm 1^\circ$ ($^\circ\text{C}$ and $^\circ\text{F}$ scales) Minimum order quantities may apply
