

BoxCar Pro 4.3 Windows Software

BoxCar Pro 4.3 Windows software for HOB0 Dataloggers provides a powerful tool for launch, download, data analysis, graphing, and data management/export. It is the only answer to fast analysis and manipulation of data and offers greater flexibility with far more data access and available information than previous versions. BoxCar Pro 4.3 supports all currently available HOB0 and StowAway loggers with the exception of Hobo U12 loggers which have 12-bit A-D's and USB interface and require GreenLine or HOB0ware software.

Features

Easy Logger Setup:

- Log min, max and average values per interval
- Sampling intervals (0.5 secs to 9 hours)
- Set start time and memory modes (e.g. stop when full, wrap around when full)
- Verify logger before launching
- Synchronise logger, shuttle and PC clocks.
- Check battery status (HOB0 H8, H6, Pro, T/C, Event, Shuttle, LCD, Water Temp Pro, and H21 Weather Stations)
- Compare multiple parameters on one graph, including data from multiple loggers or successive deployments, use zoom and axis controls to focus on areas of interest
- Add new data from stored files or drag from one plot to another
- Use multiple value axis on one graph ie. Temperature and RH
- Overlay data from different deployments to compare month-month, before-after etc
- Set axis ranges
- Use cursor to display specific plot values
- Display series data such as launch parameters and series statistics

- Add limit lines to graph
- Copy/Paste into other Windows programs
- Control axis, series and legend properties
- Export to Microsoft Excel, Powerpoint, Lotus 1-2-3, or other ASCII compatible programs
- Analyse or filter key information from logged data over specified time intervals
- Print preview, graphs and series details
- Multiple logger launch
- Use long file names (up to 255 characters)
- Offload data/check status while logging with selected HOB0's
- Complete with logger/PC serial cable

Minimum system requirements:

PC running Windows XP/2000/Me/98, CD-ROM drive. 16 bit colour display, 10MB of disk space, serial communication port (USB adaptor available).

BoxCar Pro will operate on the Microsoft Vista platform with certain limitations. Help in BoxCar® Pro will not work as Microsoft has intentionally removed the help engine from Vista as an encouragement to migrate to a new Microsoft Help facility.

Order Information:

BoxCar Pro 4.3 Starter Kit
USB Serial Adapter (Windows 98 must be SE version)

Part No.

BCP4.3-ON
