Transalim Paper Recorders

Proven – Reliable – Portable/Fixed Installation

Battery operated, paper-disc Transalim recorders are available with ranges and chart speeds to suit a wide range of applications in food transport and storage.

The Transalim recorder is specially designed for vehicles transporting perishable foodstuffs under controlled temperature conditions.

TRANSALIM uses gas expansion measurement technology to monitor temperature accurately.

The recorder complies with the NF EN 12830 standard and this recorder is easily fixed to either the outside or the inside of the compartment to be monitored.

It is vibration and weather-resistant.

The Transalim Recorder is available with 1 or 2 channels.

- Temperature measurement accuracy at 23°C: $\pm 2\%$ (class 2 of the EN 12830 standard)
- Measurement range : $-25^{\circ}\text{C}+25^{\circ}\text{C}$
- Recording time: 24 hours or 7 days or 28 days
- Recording medium: Circular diagram on pre-printed paper
- Diagram movement: Quartz clockwork
- Power supply : battery 1.5V
- IP Rating:IP65
- Complete with battery, fibre-tip pen, and manual
