

Reversible Colour Change Temperature Indicator Labels

Product Images

Short Description

The sensitive area of these labels responds quickly to temperature fluctuations to give a clear and easy to interpret indication of temperature value.

Description

The sensitive area of these labels responds quickly to temperature fluctuations to give a clear and easy to interpret indication of temperature value.

On changing the applied temperature the label will quickly respond to the new value.

Applications include environmental, live electrical, engineering, food, and pharmaceutical applications.

Accuracy: $\pm 1^\circ$ ($^\circ\text{C}$ and $^\circ\text{F}$ scales).

Minimum order quantities may apply.

There are many variants available. To see the full range, click the Download link on the Resources tab.

Additional Information

Brand	TMC - Hallcrest
Typical applications	Food Safety
Measurements	Temperature
