## Product Images

## Short Description

The RL5000 range is a new series of Hanwell radio telemetry transmitters, designed for use with the Radiolog 8 environmental monitoring system. The units are in IP65-rated cases and are suitable for use in tough environments.

## Description

---

The RL5000 range is a new series of Hanwell radio telemetry transmitters, designed for use with the Radiolog 8 environmental monitoring system. The units are in IP65-rated cases and are suitable for use in tough environments.

Each RL5000 has two inputs for probes, the combination of which can be custom-defined. Supported temperature probe types include: thermistors, PT100s and thermocouples. The RL5000 also supports humidity probes and linear inputs. Probes are supplied separately.

The transmitter ID, transmission speed and calibration data is programmed into its on-board memory using Radiolog 8, a software package which automatically recognises the type of unit connected to the PC via the USB lead.

The custom-designed LCD indicates current readings of two channels (based on the onboard calibration data), battery life and alarm conditions.

## Additional Information

---

Promotion	Tempcon no longer represent IMC Hanwell in the UK, however we do calibrate these products. Please contact us to discuss your requirements. <a href="#">View our extensive range of wireless data logging solutions.</a>
Brand	Hanwell
Typical applications	Environmental (Indoor)
Measurements	Humidity, Temperature
