

S-VIA-CM14 12-bit 0-5 Volt Input Adaptor

Product Images

Short Description

The 0 to 5 volt Input adaptor enables Weather Stations to measure voltage levels.

The Input Adaptor also provides a trigger source voltage for powering external sensors and an open collector trigger.

The Input Adaptor has a plug-in modular connector that allows it to be easily added to a Weather Station, or Micro Station.

Part No:
S-VIA-CM14

Description

The 0 to 5 volt Input adaptor enables Weather Stations to measure voltage levels.

The Input Adaptor also provides a trigger source voltage for powering external sensors and an open collector

trigger.

The Input Adaptor has a plug-in modular connector that allows it to be easily added to a Weather Station, or Micro Station.

Part No:
S-VIA-CM14

Additional Information

Brand	Onset HOBO
Typical Application	Voltage Output: 0-5 VDC
Measurements	Voltage DC
Compatible With	U30, H21, H22
