

S-BPA-CM10 Barometric Pressure Smart Sensor

Product Images

Short Description

The Barometric Pressure Smart Sensor is designed for use with HOBO H21 Weather Stations.

The Smart sensor has a plug-in modular connector that allows it to be easily added to HOBO Weather Stations.

All sensor parameters are stored inside the Smart sensor which automatically communicates configuration to the logger.

Description

The Barometric Pressure Smart Sensor is designed for use with HOBO H21 Weather Stations.

The Smart sensor has a plug-in modular connector that allows it to be easily added to HOBO Weather Stations.

All sensor parameters are stored inside the Smart sensor which automatically communicates configuration to the logger.

Measurement Range:
660 to 1070 mbar

Part No:
S-BPA-CM10

Additional Information

Brand	Onset HOBO
Measurements	Barometric Pressure
Compatible With	U30, H21, H22
