

Hanwell ML4109

Product Images

Short Description

The ML4109 is part of the 4000 range of advanced temperature and humidity radio transmitters. It allows wire-free monitoring in an outside area, with real time alarm notification and historical analysis of data.

Description

The ML4109 is part of the 4000 range of advanced radio transmitters. It allows wire-free monitoring in an

outside area, with real time alarm notification and historical analysis of data. Each ML4109 unit reads its on-board sensors providing accurate and reliable information about environmental conditions. This data is transmitted, at user-defined intervals, to the Radiolog system where it is filed for analysis.

The ML4109 has a precision temperature sensor and a high quality humidity sensor. Each 4000 radio transmitter has enough internal memory to store up to 100,000 readings and is in fact continually logging.

Additional Information

Promotion	Tempcon no longer represent IMC Hanwell in the UK, however we do calibrate these products. Please contact us to discuss your requirements. View our extensive range of wireless data logging solutions.
Brand	Hanwell
Typical applications	Environmental (Indoor), Non Specific
Measurements	Humidity, Temperature
