Description

This product has been discontinued, please check the related products for a suitable alternative.

The Wind Speed/Direction Smart Sensor is designed for use with HOBO H21 Weather Stations.

The Smart sensor has a plug-in modular connector that allows it to be easily added to HOBO Weather Stations.

All sensor parameters are stored inside the Smart sensor which automatically communicates configuration to the logger.

Measurement Range: 0 to 44 m/sec

Part No: S-WCA-M003

Note: New CE Mark compliancy requires changes to this product. Please check current delivery status with Tempcon Sales Office.
