

DT80 DataTaker Data Logger

Product Images

Short Description

A robust, stand alone data logger featuring a built-in display, USB memory stick support, 18-bit resolution and extensive communications capabilities.

Description

The DT80 is a robust, stand alone, low power data logger featuring USB memory stick support, 18 bit resolution, extensive communications capabilities and built-in display. The dataTaker® DT80's Dual Channel concept allows up to 10 isolated or 15 common referenced analog inputs to be used in many combinations.

With support for multiple SDI-12 sensor networks, Modbus for SCADA systems, FTP and Web interface, 12V regulated output to power sensors, the DT80 is ready to be rolled out into environmental, industrial and many other types of monitoring projects.

Additional Information

Brand	Grant
Channel(s)	12
Typical applications	Environmental (Indoor)
Measurements	Universal
