Description

The Ametek Jofra ITC series (Industrial temperature Calibrators) are the mid-range dry-block calibrator models offered by Tempcon.

The ITC-650 model features a slim and rugged design with intuitive user interface and dual-zone heating block and MVI circuitry.

The design basis is portability and ease-of-use supplied at a reasonable cost without sacrificing accuracy, performance, and features.

The ITC series offer new improved accuracy and stability specifications. Designed for both on-site and maintenance shop use.

It's important to note that the price shown is a guide price for comparison purposes. It refers to a bare base unit as there are simply too many options to list. Please contact us directly to discuss your requirements, it won't take long and will enable us to provide you with an accurate price for the equipment you really need.

Wide temperature range: +33°C to +650°C
