

RTC-157 Jofra Dry-Block Calibrator

Product Images

Short Description

The Ametek RTC-157 Jofra dry-block calibrator has been designed to be functional, convenient and maintain excellent accuracy for calibration of temperature sensors. The light weight means that this calibrator is a truly portable instrument. Wide temperature ranges and multi-hole inserts enable fast calibration of most probes.

Description

The Ametek RTC-157 Jofra dry-block calibrator has been designed to be functional, convenient and maintain excellent accuracy for calibration of temperature sensors. The light weight means that this calibrator is a truly

portable instrument. Wide temperature ranges and multi-hole inserts enable fast calibration of most probes.

RTC Calibrators are accurate to ± 0.04 Deg C using an external reference sensor.

It's important to note that the price shown is a guide price for comparison purposes. It refers to a bare base unit as there are simply too many options to list. Please contact us directly to discuss your requirements, it won't take long and will enable us to provide you with an accurate price for the equipment you really need.

Range -45 to +155 Deg C

Order Code:

RTC-157

Additional Information

Brand	Jofra
Maximum Temperature	+155
Typical applications	Calibration
Measurements	Temperature
