

Discontinued: HOBO U12-011 Temp/RH Data Logger

Product Images

Short Description

The U12-011 Temperature/Relative Humidity Data Logger has been replaced by the NEW HOB0 UX100-011 (See related products)

Description

This item has been discontinued - see the [UX100-011](#) for a suitable replacement.

The U12-011 is a small, accurate Data Logger for Temperature and Relative Humidity with 64K memory, 12-bit resolution, internal sensors and direct USB interface for fast download of stored data.

Features:

- Range: -20°C to +70°C
- Relative Humidity Range: 5% to 95% RH
- Blinking LED confirms operation
- Non-volatile memory retains data
- Easy launch and readout via HOB0ware software for Windows or for MAC
- Programmable start time/date
- Programmable sampling rate (1 sec to 18 hrs)
- Data can be viewed in three formats: graphical, tabular and deployment statistics
- Use zoom and axis controls
- Control axis, series and legend properties
- Verifies logger before launch or while logging
- Displays memory used and battery voltage
- 'One-click' easy upload into Excel and other programs
