The User Model row suggests some guidelines for using the Processor Speed and Memory table:
User Model 1 - Using HOBO Data loggers only, no data nodes - traditional desktop user
User Model 2 - Using HOBO Data loggers and up to 5 data nodes, 20 sensors
User Model 3 - Using HOBO Data loggers and up to 50 data nodes, 100 sensors
User Model 4 - Using HOBO Data loggers and up to 100 data nodes, 200 sensors

*** Disk Space** - Defining the disk space requirements for HOBOware depends on the proposed use. The table above describes the disk space needed for a traditional desktop user, allowing for installation of the program and storage of data files. For users of HOBO data nodes, the space requirements depend on a variety of factors, including the number of nodes, the number of sensors, the frequency of data sampling, the longevity of deployments, and other factors.
