

USB Cable A/M to Mini B/M

Product Images

Short Description

This simple USB lead is used for configuration of Status products which have a USB interface built in.

Description

This simple USB lead is used for configuration of Status products which have a USB interface built in. The lead is used to connect the USB port of your Lap-Top or PC to the USB port in the Status product.

The product is powered during configuration from the USB port of your computer. This also means the product doesn't need to be wired to a power supply for configuration which is ideal for quick set up prior to installation.

A/M to Mini B/M USB Cable for the SEM206/TC 'Smart' in-head transmitter USB Configurator cable.

Part No:
48-200-0001-01
