

# SEM USB Configurator with Cable

## Product Images

## Short Description

The USB configuration kit provides a link between the USB port of your PC or Lap-Top and all Status products that use loop communication.

## Description

The USB configuration kit provides a link between the USB port of your PC or Lap-Top and all Status products that use loop communication. The product, as well as the configurator, is powered during configuration from your PC's USB port so no additional power supply is needed during the configuration process.

The Configurator & Cable is suitable for the SEM1610 DIN Rail mounted Universal Transmitter.

Part No:  
USB-CONFIG-MKII
