

Digitron DGS-10 Gas Leak Detector

Product Images

Description

The DGS-10 Gas Leak Detector (or "Gas Sniffer") has been specifically designed for HVAC engineers when pinpointing flammable gases in both residential and commercial applications.

The DGS-10 has a long flexible goose neck and small sensor head to allow it's use in tight, difficult to reach

areas.

A unique 'tip-light' incorporated into the sensor head illuminates the area around the leak.

Key Features

- Simple, adjustable audible and visual 'tic rate' increases as the sensor tip approaches a leak
- Long 400mm goose neck for remote access
- 'LED Light' illuminates the tip sensing area
- High sensitivity provides accurate detection
- Rubber boot protects instrument.

Additional Information

Explanation	Sensitive to: Methane, Propane, Natural Gas, Butane & others* Power Supply: 9v Alkaline battery Battery Sensitivity: 10 ppm Methane Warm up: Approx 1 minute Response time: Instantaneous Size: 3.0" x 6.5" x 1.5" (77 x 170 x 40) mm Weight: 1.lb (450g) Probe Length: 16" (406mm)
Ideal For	Professional
Brand	Digitron
Typical applications	Building Monitoring, Building Performance, Environmental (Indoor), Hazardous, HVAC
Measurements	Gas Level
