Short Description

Key Features: 0 to 10bar operating range 21bar over range 0°C to 50°C/+14°F to 122°F (ambient) Zeroing function Hold function Range lock function & Max/Min Selectable units of pressure All 2000 series instruments are dust and waterproof as standard (IP67) and optional coloured rubber boots are available adding protection and style to these multifunctional pressure instruments. It is possible to measure negative pressure (air vacuum) by connecting to the -ve port, provided the +ve port is vented. The value shown will be

+ve

Description

The Digitron 2000P series of hand held digital manometers are easy to operate, reliable and built to meet the performance and cost demands of today's industrial and HVAC professionals.

The units offer twin input for differential or gauge measurement with pressure ranges from 25mbar to 10bar.

2026P7 Key Features

- 0 to 10bar operating range
- 21bar over range
- 0°C to 50°C/+14°F to 122°F (ambient)
- Backlit function
- Zeroing function
- Hold function
- Range lock function
- Max/Min
- Selectable units of pressure

All 2000 series instruments are dust and waterproof as standard (IP67). Optional coloured rubber boots are available, adding protection and style to these multifunctional pressure instruments.

It is possible to measure negative pressure (air vacuum) by connecting to the -ve port, provided the +ve port is vented. The value shown will be +ve.

Additional Information

Brand	Digitron
Range	0 - 10 bar
Battery type	2 x AA batteries (included)
Typical applications	Environmental (Indoor), Environmental (Outdoor), HVAC, Industrial
Measurements	Pressure
