

## U2X Protective Housing

### Product Images

### Short Description

The U2X Housing is a protective enclosure for mounting Onset's HOBO® U24 conductivity and HOBO U20 water level loggers. The U2X housing is designed to allow a data logger to be mounted in harsh environments while not restricting the flow of media around the device. Supplied with 6 zip ties and mounting recommendations, it allows for easy deployment into a variety of water monitoring applications.
