Description

The Fluke 568 multipurpose thermometer makes even complex temperature measurements easy, with a straight-forward, menu-driven user interface and graphical display. The 568 expands on the capabilities of the 566 by increasing the temperature range from 650°C to 800°C and also improving on the distance to measurement spot. Data Logging is also improved from 20 points to 99 points.

Navigation is quick and it's easy to adjust emissivity, start data logging, or turn on and off alarms, with just a few pushes of a button. The rugged handheld thermometer combines contact and non-contact temperature measurement capability, for added convenience, providing a total temperature measurement solution for any service and maintenance program.
