Short Description

The latest version of DicksonWare™ Secure Software includes all the features of the standard software, but also provides:

Description

The latest version of DicksonWare™ Secure Software includes all the features of the standard software, but also provides:

- 21CFR11 Compliance
- Password protection for your settings
- Data encryption
- Labeling of all charts with the User ID and serial number of your logger

- An audit trail of user activity

Use the software to setup your Dickson loggers, view and download data, and reset your logger to the factory settings.

This version of the software is typically recommended for complying with the regulations of food and drug companies and comes complete with a USB cable.
