

DM3420 Current/Voltage Input Panel Meter With Output Options

Product Images

Short Description

The DM3420 panel meter accepts Voltage and Current process signals and displays the process value on a high efficiency daylight readable LED display.

Description

The DM3420 panel meter accepts Voltage and Current process signals and displays the process value on a high efficiency daylight readable LED display. A built in transmitter power supply is also provided.

The highly innovative case design features option "Pods" which can be plugged in without dismantling or re-calibration. These provide optional outputs of programmable current and 2 x trip relays for alarm points.

Additional Information

Brand	Status
Display Colour	Red
Display Digits	4
Typical applications	Environmental (Indoor), Industrial
Measurements	Current AC, Voltage AC, Voltage DC
