Short Description

The Mini SPY RF Green

Description

The Mini SPY RF Green is an eco-friendly wireless temperature datalogger with built-in temperature sensor – the ideal solution for cold chain temperature monitoring of your thermosensitive products.

Robust and washable, it is resistant to vibrations and shocks during transport. It is remotely configurable and data is automatically collected.

This data recorder wirelessly transmits measurements to a server PC at regular intervals via 868 and 902 MHz bands (compatible with the medical, scientific industrial and industrial environments). Data can be managed on the Sirius Storage software or MySirius application.

Mini SPY RF Green Benefits

- Ecological: recyclable
- Reliability: robust and washable
- Security: local and remote alarms
- Easy to use: automatic radio data download

Additional Information

Explanation	<ul style="list-style-type: none">• Measurement range: -40°C to +85°C• Accuracy: ±0,4°C from -20 to +30°C and ±0,5°C from -40 to -20°C and from +30 to +80°C ±0,7°C above+80°C• Type of Sensor: Internal temperature or external (1m cable Ø4x50mm)• Resolution: 0.1°C• Protection index: IP67• Medium range radio: 1 km with open field• Acquisition: 1 s to 90 mn• Internal memory: 10,000 measurements• Radio band: 868 Mhz or 902 MHz• Battery life: 2 years (lithium battery and replaceable by the user)• Conformity: EN12830, CE, ROHS, ETS 300-220
