

# JRI SIRIUS Lite Software

## Product Images

## Short Description

SIRIUS lite is a single user software for simplified use (one server PC, one SPY RF Modem and an unlimited number of SPY RF recorder).

## Description

SIRIUS Lite is a single user software for simplified use (one server PC, one SPY RF Modem and an unlimited number of SPY RF recorder).

This Software allows you to:

- See all the measurement points at a glance thanks to the dashboard
- Receive the most relevant information in case of alarm by email or MMS (graphics, values, thresholds, monitored units, etc...)
- Set up alarms for: SMS, email, MMS, telephone call
- Monitor the quality of stored products with the MKT function (Mean Kinetic Temperature), enabling the level of degradation of thermo sensitive to be determined
- Secure data (cannot be falsified)
- Displays one or more curves with statistics
- Presents data in form of graphs or tables
- Exports data in Excel format
