

FM21 Folding Digital Food Thermometer with Probe -40°C to +250°C

Product Images

Short Description

Low-cost, accurate folding digital pocket food thermometer probe ideal for use in catering and food processing environments.

Description

The FM21 is a low-cost, accurate folding digital pocket-size food thermometer with probe ideal for use in catering and food processing environments. It is IP65 rated (water resistant) and perfect for checking core temperatures of food before serving.

With a large LCD screen and quick response time, temperatures can be viewed quickly and easily whilst the fold-away probe makes it very compact.

Key Features

- Large LCD

- Quick response
- Long battery life
- Folding probe

Specification
