

ESI GS4000 General-Purpose Pressure Transducer

Product Images

Short Description

The GS4000 is a General-Purpose Transducer designed perfectly for O.E.M applications with its strain gauge technology and unique manufacturing techniques. It's ideal for applications where economical price and reliable pressure measurement is required.

Description

The GS4000 is a General-Purpose Transducer designed perfectly for O.E.M applications with its strain gauge technology and unique manufacturing techniques. It's ideal for applications where economical price and reliable pressure measurement is required.

- Available in pressure ranges from 0-0.5bar to 0-700bar
- All Stainless Steel Construction
- Strain Gauge Technology
- Output Options 0-20mVds, 0-5Vdc, 0-10Vdc and 4-20mA
- Great Stability and Accuracy
- Low Cost
- CE Approved
- O.E.M Applications

Additional Information

Brand	ESI
Typical applications	Non Specific
Measurements	Pressure
