

Imperial Parallel Threaded Compression Fittings - Brass (1/4" BSP)

Product Images

Description

Imperial Parallel Threaded Compression Fittings - Brass (1/4" BSP)

These Parallel Threaded Compression Fittings are available in both Stainless Steel and Brass.

The male thread is screwed into the process and a compression olive holds the sensor in position. These fittings allow adjustable sensor immersion into the process and offer excellent gas/water tight seal. These fittings are also used to couple the probe with a thermowell or thermopocket.

A range of accessories including extension cables, connectors, pockets, thermowells and adjustable compression fittings are available on our webshop.

Accuracy to IEC 60584.1 2013 Class 2 (Class 1 also available)

IEC 60584.3 2008 colour coded extension cables and connectors

In House Calibration Service is also available

Bespoke designs available upon request
