# HOBO Compressed Air Flow Meter Sensor (40 - 600 SCFM, Nominal Pipe Size 2 inches)

### **Product Images**

#### **Short Description**

Effectively monitor compressed air systems with the CDI meter.

#### **Description**

Effectively monitor compressed air systems with the CDI meter. This flow meter includes two probes, one warmer than the other. This arrangement calculates mass velocity based on heat requirements. Additionally, pipe area data is used to determine flow amounts.

Available in two versions:

- T-CDI-5200-10S Output: 4-20mA representing 1 to 80 SCFM of air, Nominal Pipe Size: 1 inch
- T-CDI-5400-20S Output: 4-20mA representing 40 to 600 SCFM of air, Nominal Pipe Size: 2 inches

#### **Key Features**

- Easy to install
- Digital display

Requirements for use with specific data loggers:

- HOBO MX1100 series: a 4-20mA input cable (SD-MA-420) and external power provided by an AC adapter (AC-SENS-1)
- HOBO U12, UX120-006M, or ZW series: a 4-20mA input cable (CABLE-4-20mA) and external power provided by an AC adapter (AC-SENS-1)
- HOBO RX3000: an analogue input module (RXMOD-A1)
- HOBO U30: an analogue input module (VIA)
- HOBO H22: an analogue input module (S-FS-CVIA)

## **Additional Information**

Country of Manufacture

**United States**
