

CO2 monitor AIRCO2NTROL OBSERVER 31-5002

Product Images

Short Description

- People who breathe good air are healthier, happier and can achieve more. Too high a concentration of CO2 in the air is often to blame for headaches, dizziness and permanent fatigue.
- With the AIRCO2NTROL OBSERVER from TFA, you can check how stale and polluted the air is in rooms where people are present, e.g. schools, offices, public buildings. Timely and energy-efficient ventilation enable you to ensure a healthy indoor climate.

- The monitor shows the CO2 content of the room air on its large-format XL display in coloured LED digital lights visible from a distance. Depending on the air quality, the colour of the smileys changes from green and yellow to red. In addition, they indicate the temperature and humidity. The brightness of the display automatically adjusts to the environment.

Description

Highlights:

- To monitor the carbon dioxide (CO2) levels
- Large display with luminous-coloured LED digits
- Large display with luminous-coloured LED digits
- Display of ambient temperature and humidity
- Automatic brightness adjustment
- With smiley traffic lights

Function

- XL-format
- Widely visible display with luminous LED digits and coloured "Smiley" indication for the control of CO2 levels in buildings
- High-quality NDIR Dual Beam sensor
- With temperature and humidity display
- Automatic brightness adjustment

Additional Information

Brand	TFA Dostmann	
Explanation	Measuring range	CO2: 0 - 3000 ppm
	Measuring range temperature indoor	0 - +40°C
	Delivery contents	CO2 monitor, power adaptor, instruction manual
	Measuring range humidity indoor	20 - 90%
	Material	Plastic
	Assembling	Wall mounting or free-standing
	Dimensions	(L) 298 x (B) 44 (122) x (H) 213 mm
	Weight	1075 g
Measurements	CO2	
Power	Battery only
