Pure Sine Wave Inverter: Designed with a pure sine wave inverter to safely power sensitive electronics, preventing damage caused by irregular power flow.

Wireless Charging: Includes a 15W wireless charging feature for a convenient, cable-free charging solution, thus adding to its versatility.

Recharge: Engineered for solar panel charging, simply connect the solar panel to the default input port (no wiring required). The Explorer will then show the wattage received from the solar panel and, just like your phone, indicate the charge percentage of the device.

The device can also get its charge via a standard car cigarette lighter or, if necessary, directly from a regular mains 3-pin socket.

The Explorer 1000W Portable Power Supply with MPPT Controller and Wireless Charging

Embark on your next adventure with confidence, knowing that you have a powerful and reliable energy solution at your side. This 1000W Portable Power Supply is the ultimate companion for campers, backpackers, of grid caravan and motor home travellers, and anyone needing a dependable emergency power supply.

Equipped with an impressive 1000W rated power and a 932.4WH capacity, this lightweight (8.7 kg) and portable power supply ensures your devices, appliances, and equipment remain powered up, even in the most remote locations. Its pure sine wave inverter ensures a safe and steady power flow to your sensitive electronics, offering you peace of mind as you explore the great outdoors.
