

# Portable Foldable Solar Panel 60W with USB & Power Adapter Output

## Product Images

## Short Description

Say goodbye to dead batteries with the this Energy Lightweight Solar panel with USB Charger. This compact charger harnesses the power of the sun to keep your devices topped up. It's lightweight and easy to carry, just unfold and place in the sunshine to start charging.

With 60W of power, this solar charger provides quite a punch - it can charge a wide range of portable generators, many phones, cameras, tablets and more. Plus, its size when folded makes it the perfect travel companion; you can easily take it camping, on road trips, or wherever you might need to keep your devices charged.

Remember: Just like any solar product, it works best in bright, direct sunlight. Please be sure to follow the manufacturer's instructions for use.

## Description

---

**Compact & Lightweight**, designed with pull-out legs for optimal sunlight exposure and maximum portability. Harness the sun's energy wherever your journey takes you.

**Foldable & Portable:** Portable solar panel, featuring a foldable, zip-up case design and a carry handle for effortless transport and storage. Power your devices on-the-go with ease.

**Multiple Charging Options:** Equipped with a built-in power converter, this device features multiple charging connectors, allowing for easy connectivity and powering of various devices such as phones, laptops, and cameras.

**USB Sockets:** This solar panel offers increased charging versatility. It allows you to charge using both types of USB sockets, catering to a wide range of electronic devices. Its thoughtful design ensures it meets all your charging needs, whether you're using older USB types or the latest ones.

**Solar Power:** Harness the sun's energy for on-the-go charging with our solar power solution, ideal for camping trips and beach picnics. Power your portable devices conveniently while basking in nature's glory.

"Portable power supply shown, not included"

**Recharge with Solar Power:** Buy one of our Explorer power supplies engineered for solar panel charging, simply connect the solar panel to the default input port (no wiring required). The Explorer will then show the wattage received from the solar panel and, just like your phone, indicate the charge percentage of the device.

Our optional Explorer portable power supply will store the power from a solar panel. Ideal for taking power on the go these units can charge via USB or standard 3-pin plugs.

Depending on the Explorer model you choose you can power equipment rated up to 520W or 1000W. Find out more here [Explorer 520W](#)

## Portable Foldable Solar Panel 60W with USB & Power Adapter Output

The Portable Foldable 60W Solar Panel with USB & Power Adapter Output is a compact, yet powerful,

renewable energy source offering a solution to your varied power needs.

This 60W solar panel produces a substantial amount of power to efficiently recharge your devices, from smartphones to portable power stations. Its versatility lies in its dual output features: a USB output and a power adapter output, catering to an array of electronic devices.

One of the key benefits is its foldable design which makes it highly portable. Whether you're heading to a beach picnic, setting off for a camping trip or needing backup for home power outages, this solar panel can be easily packed and carried around, ensuring you always have access to power.

In addition, the utilisation of solar energy makes this product a green energy solution, reducing your carbon footprint while simultaneously meeting your power requirements.

In conclusion, the Portable Foldable 60W Solar Panel is a potent blend of portability, power, versatility, and environmental friendliness. With it in your kit, you'll have consistent power access anywhere, anytime.
